О НАС

►История ABV

► наш сектор набирался опыту

► в 2000 году под именем Atılım Teknik, который мы создали с нашей компанией. Наша компания впервые начала производить пластмассы и пресс-формы. Мы реализовали производство автомобильной и мебельной продукции, а также вспомогательного оборудования в промышленности. Производство пресс-форм осуществляется на станках с ЧПУ и швейных центрах, а также на контрольно-измерительных машинах на компьютеризированных станках. Наша компания увеличила свое годовое производство пресс-форм на 80% благодаря инвестициям, которые она сделала, и стремится довести это увеличение до максимальных уровней за счет других инвестиций. Производство было сделано на основе продукта, и завод был построен, чтобы быть сделанным на полностью компьютеризированных машинах.

► 2008 году он начал работать под статусом компании и получил название ABV Mold. ABV Mold, которая производит пластиковые формы для литья под давлением, пластиковые детали и детали из листового металла, особенно заметна в производстве TURBO PIPE для дизельных автомобилей. Наша компания, которая день ото дня расширяет ассортимент продукции, обладает знаниями и опытом для создания форм, визуальных и эстетических продуктов.

► Мы создали с нашим брендом UBO; В будущем, благодаря качественному и эстетичному дизайну, этот сектор стремится предоставлять своим клиентам лучший сервис как в Турции, так и за рубежом.
